& Franchezca Layog

DESIGN PRINCIPLES

Productive Personal
Innovative Minimal

DESIGN GOAL

How might we create an innovative, personal OS to provide users with a productive workflow?

TYPOGRAPHY

Header 1, 28px

Header 2, 21px

Header 3, Medium, 17px

Preview Text, 15px

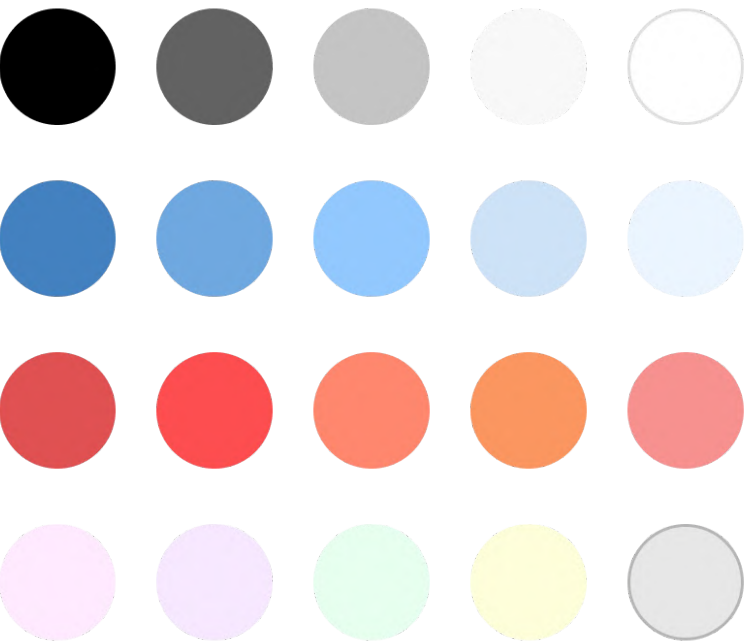

Body Text, Regular, 13px

Captions, 15px, Grey

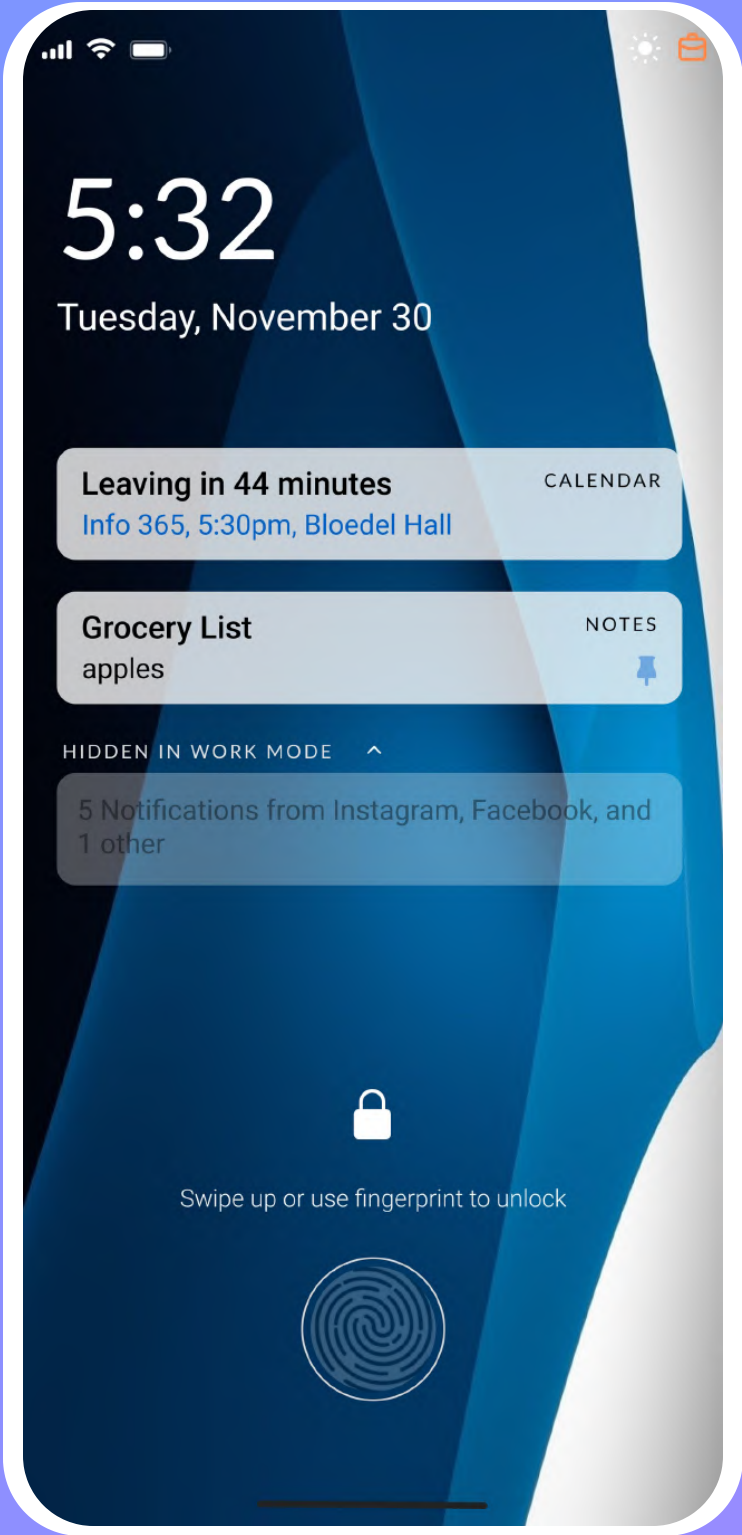

Small, Regular, 13px

COLOR PALETTE

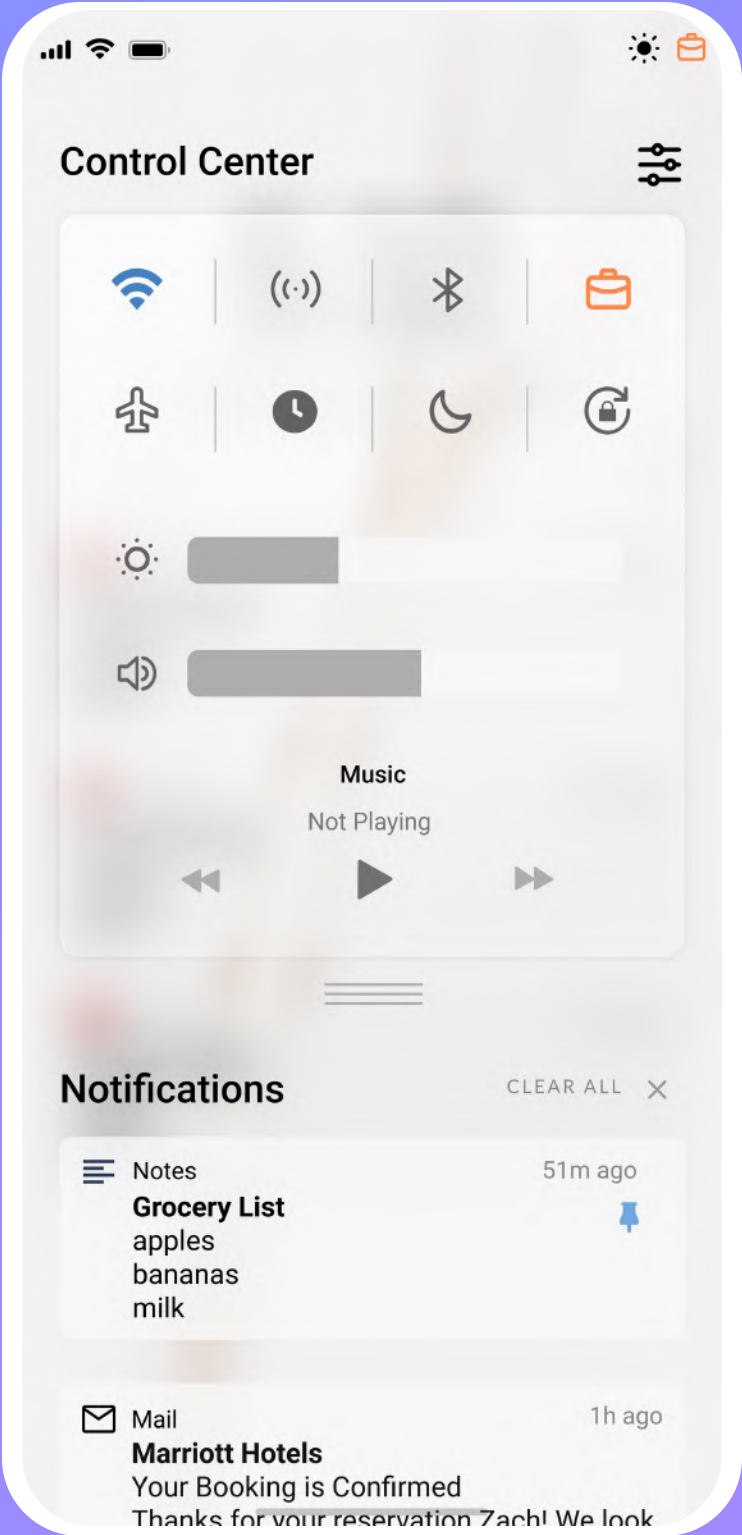

LOCKSCREEN & CONTROL CENTER

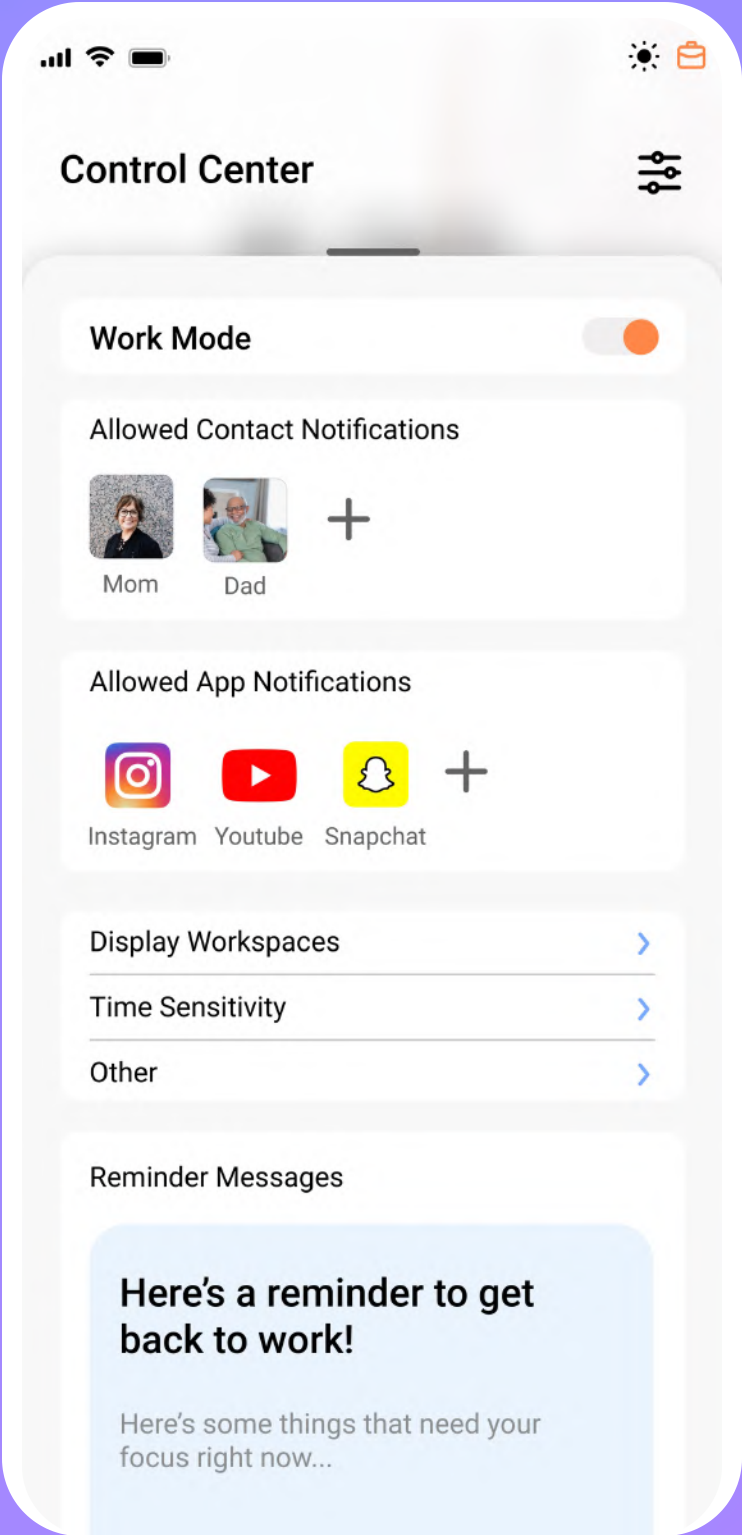

Lock Screen

Direct notifications from calendar and notes--work mode will hide notifications from certain apps.

Control Center

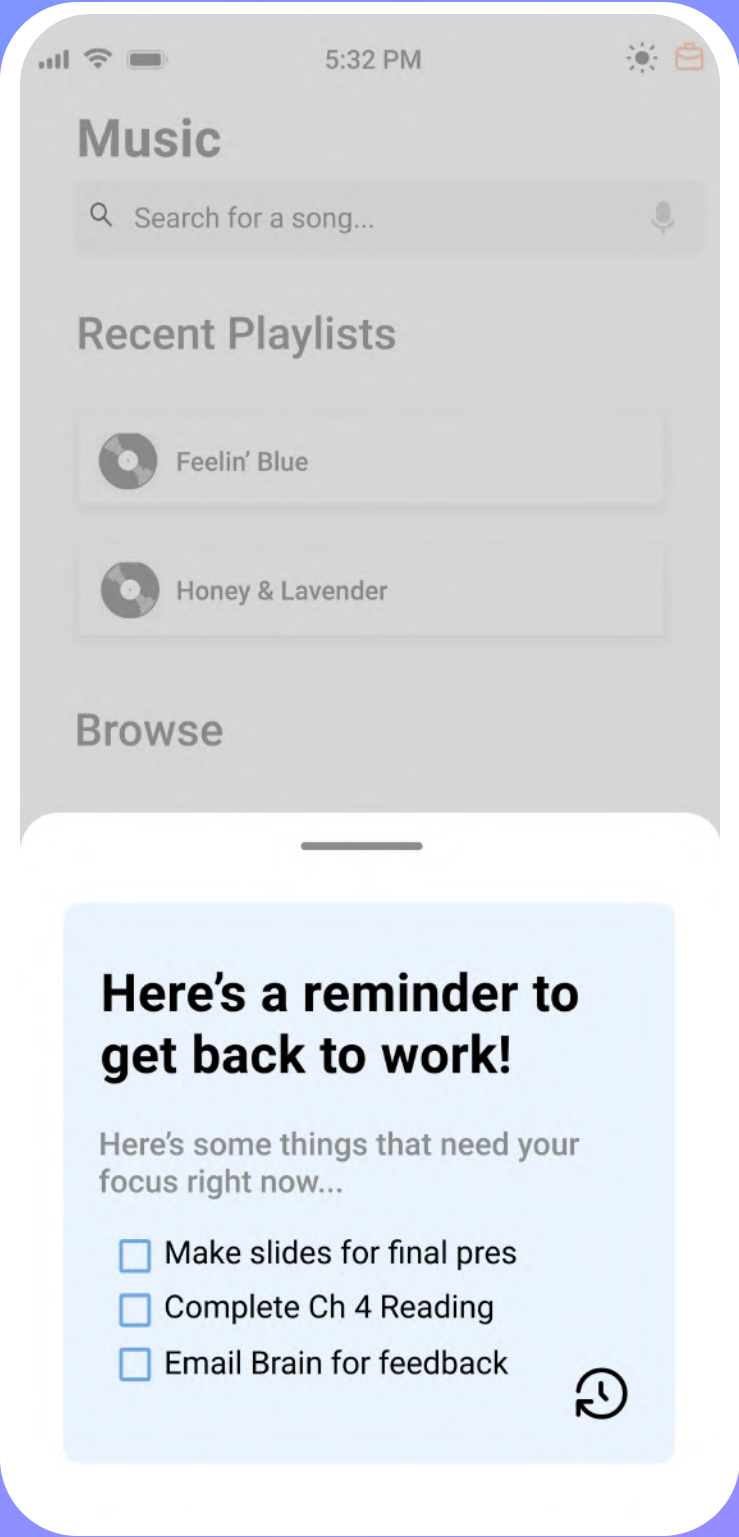

Slide down from home screen to see detailed functions including wifi, bluetooth and work mode, etc.

Work Mode Settings

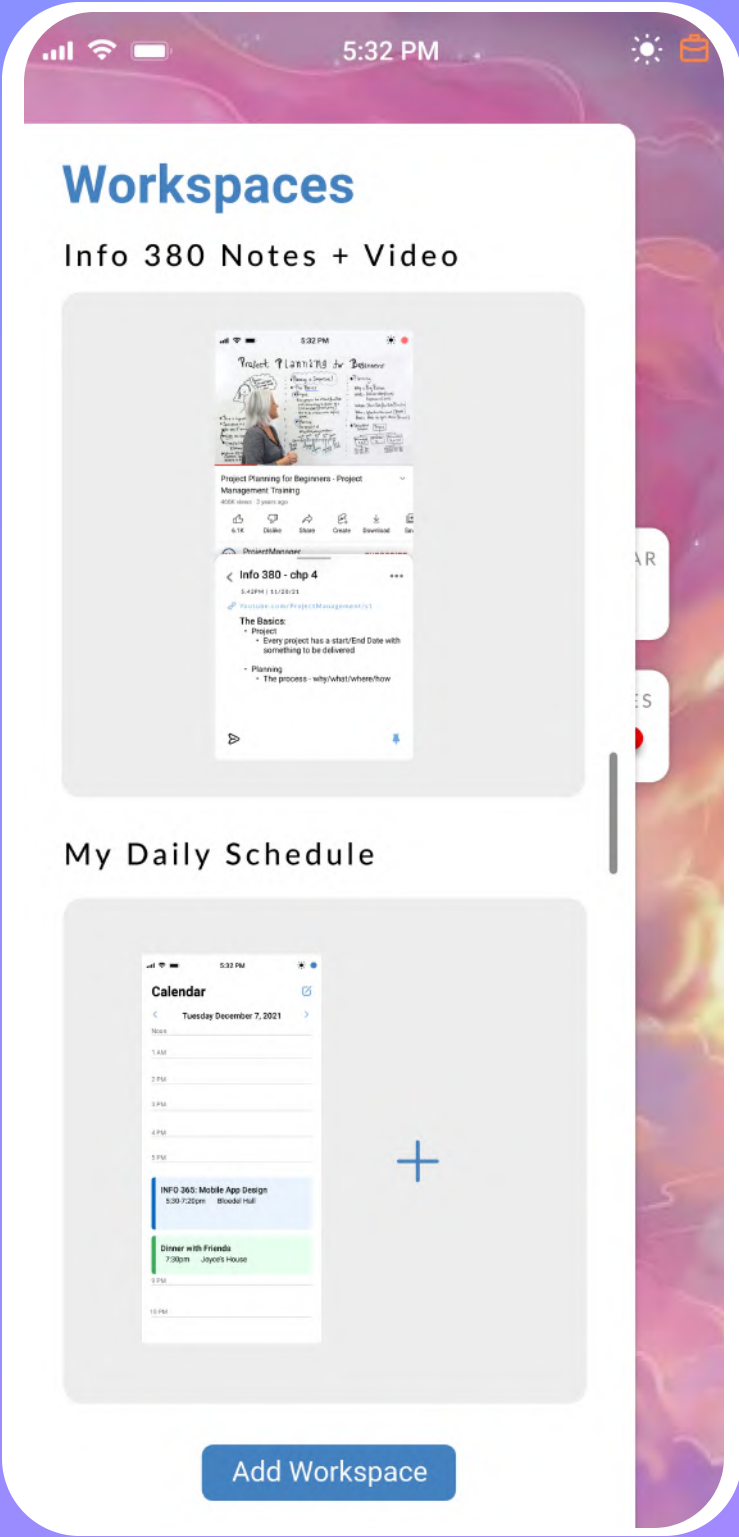

Tap into work mode settings from the control center. Message details with customizable background and multi-media functions.

FEATURE: WORK MODE

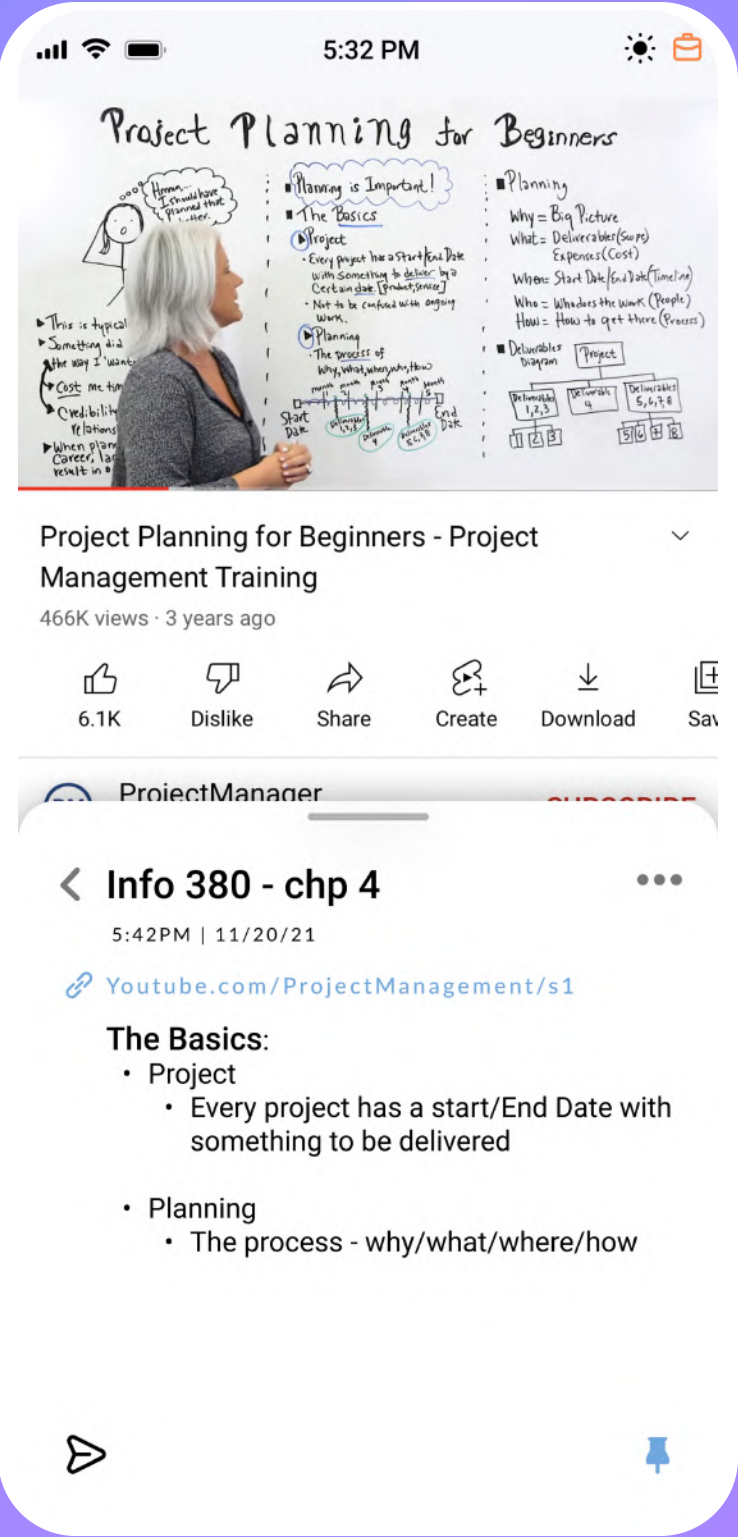

Reminders

To avoid the problem of infinity scrolling, we have app limit reminders. A gentle dialog box reminder pops up as you hit the app time limit.

Workspaces

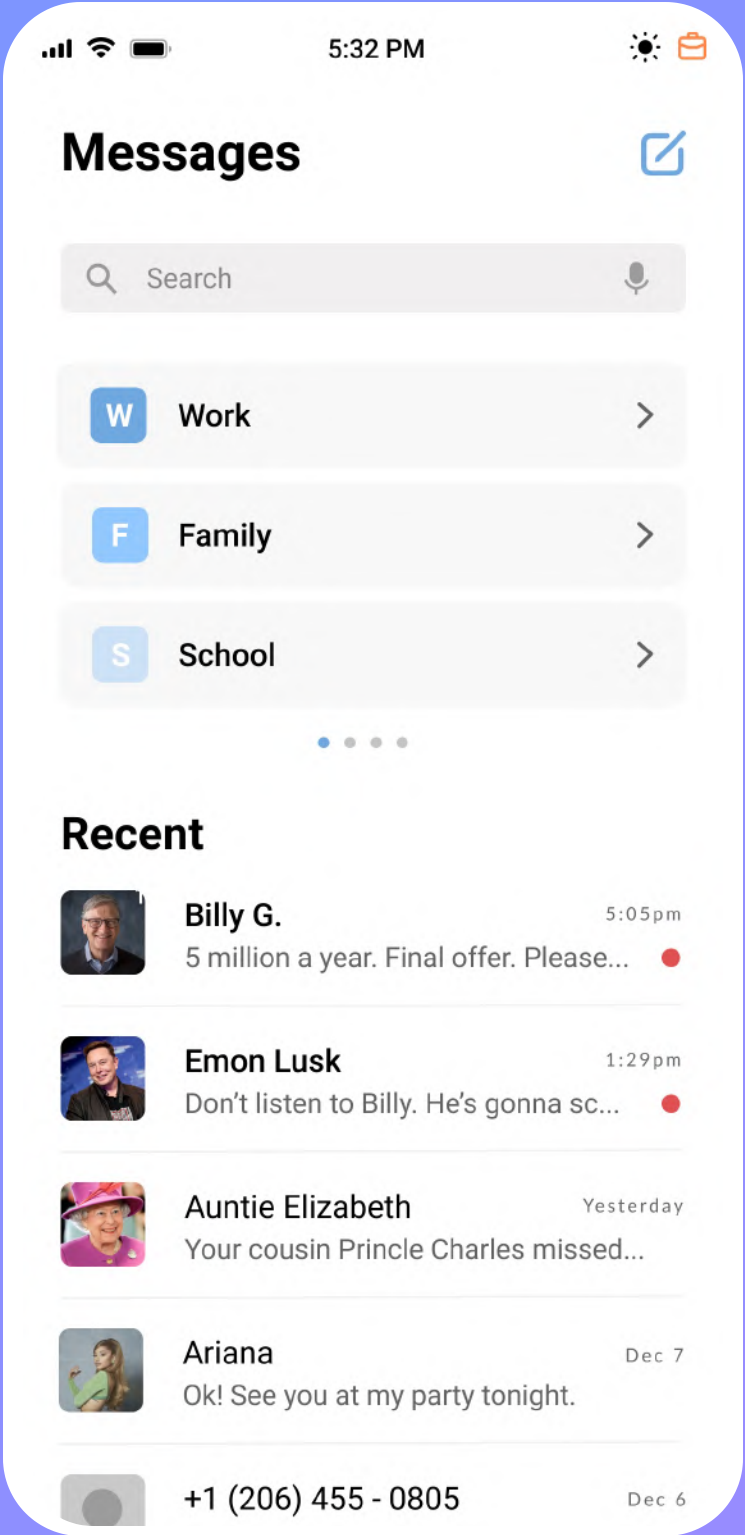

Create easily accessible workspaces to switch between sessions.

Individual Workspace

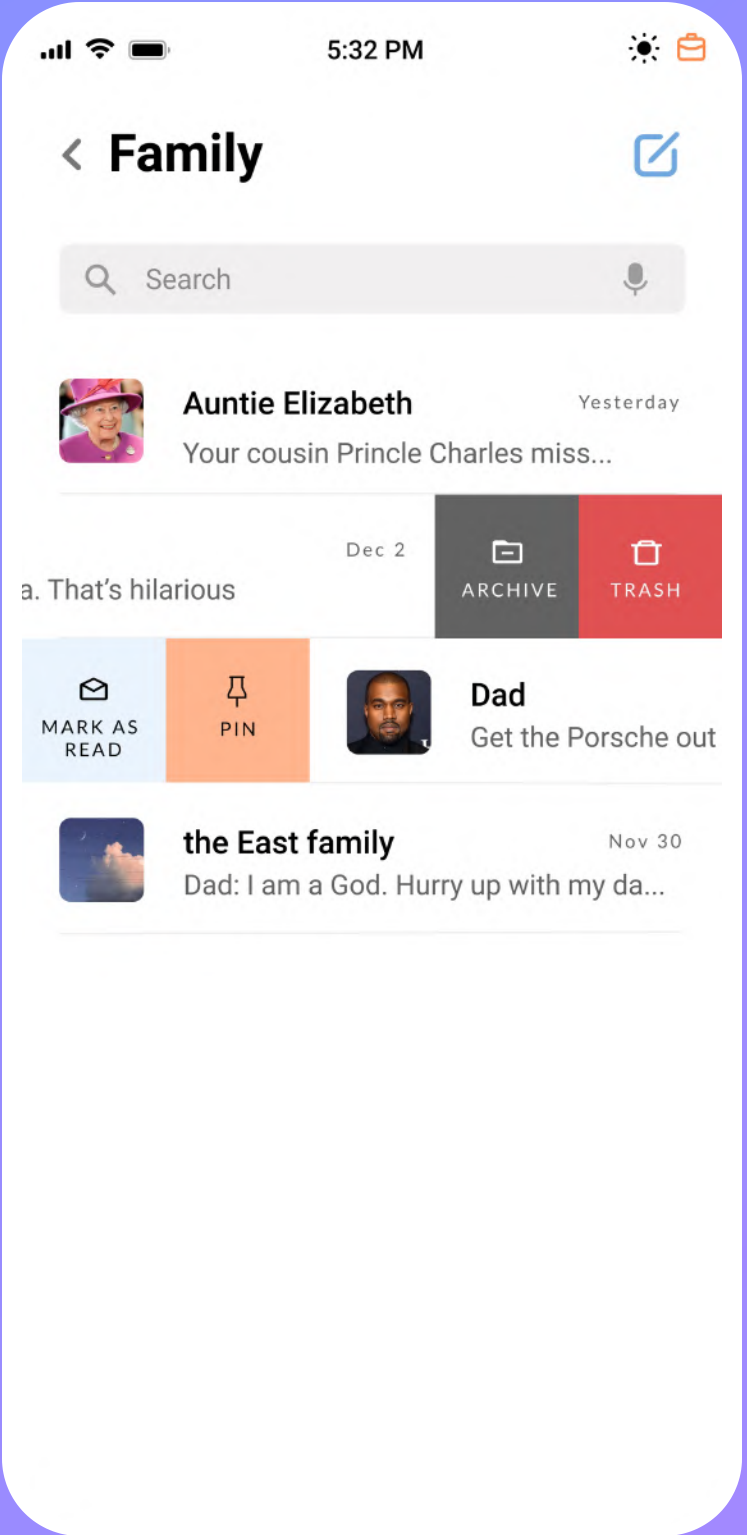

Increase efficiency and productivity by viewing multiple apps in the same workspace.

MESSAGES

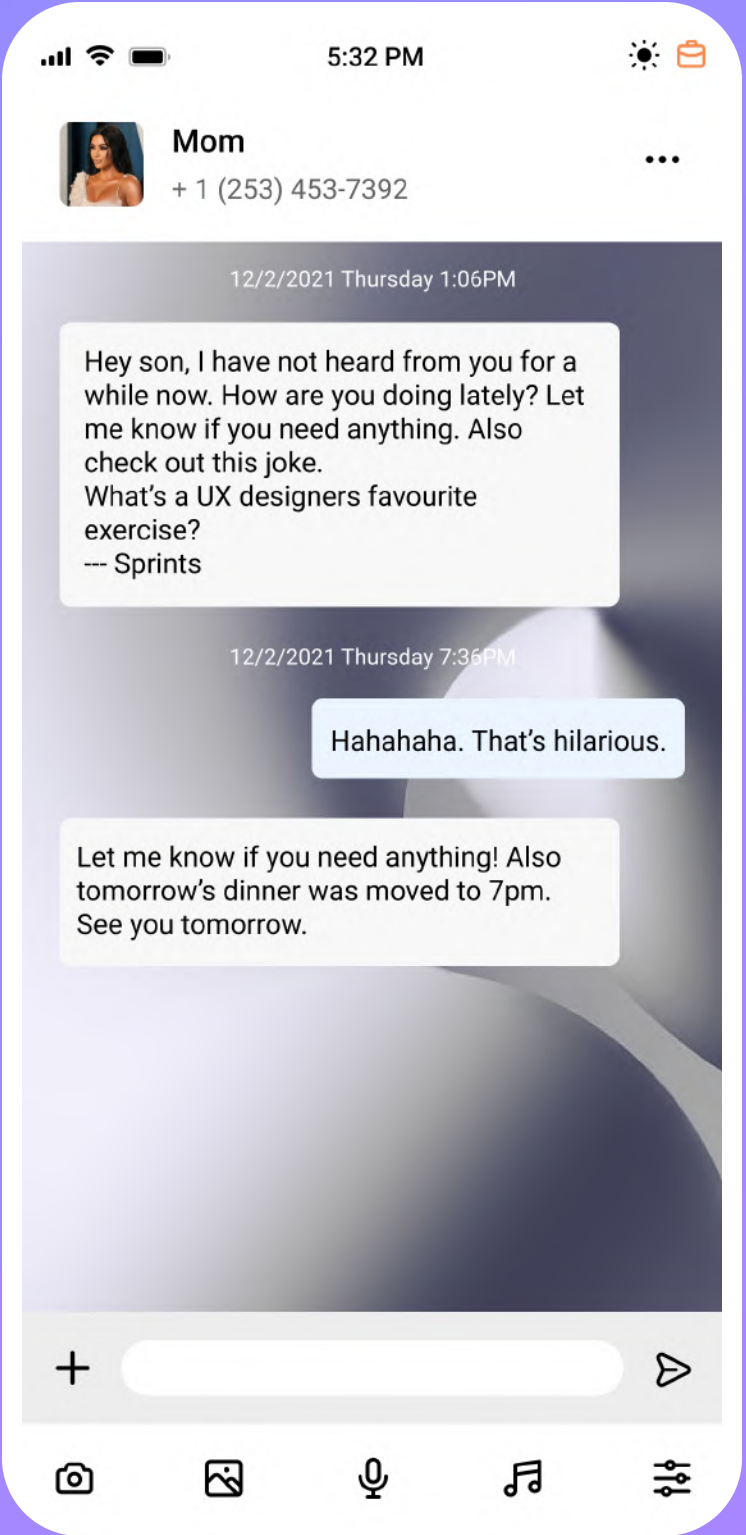

Landing Page

Customizable categories and messages in order of recency.

Category View and Actions

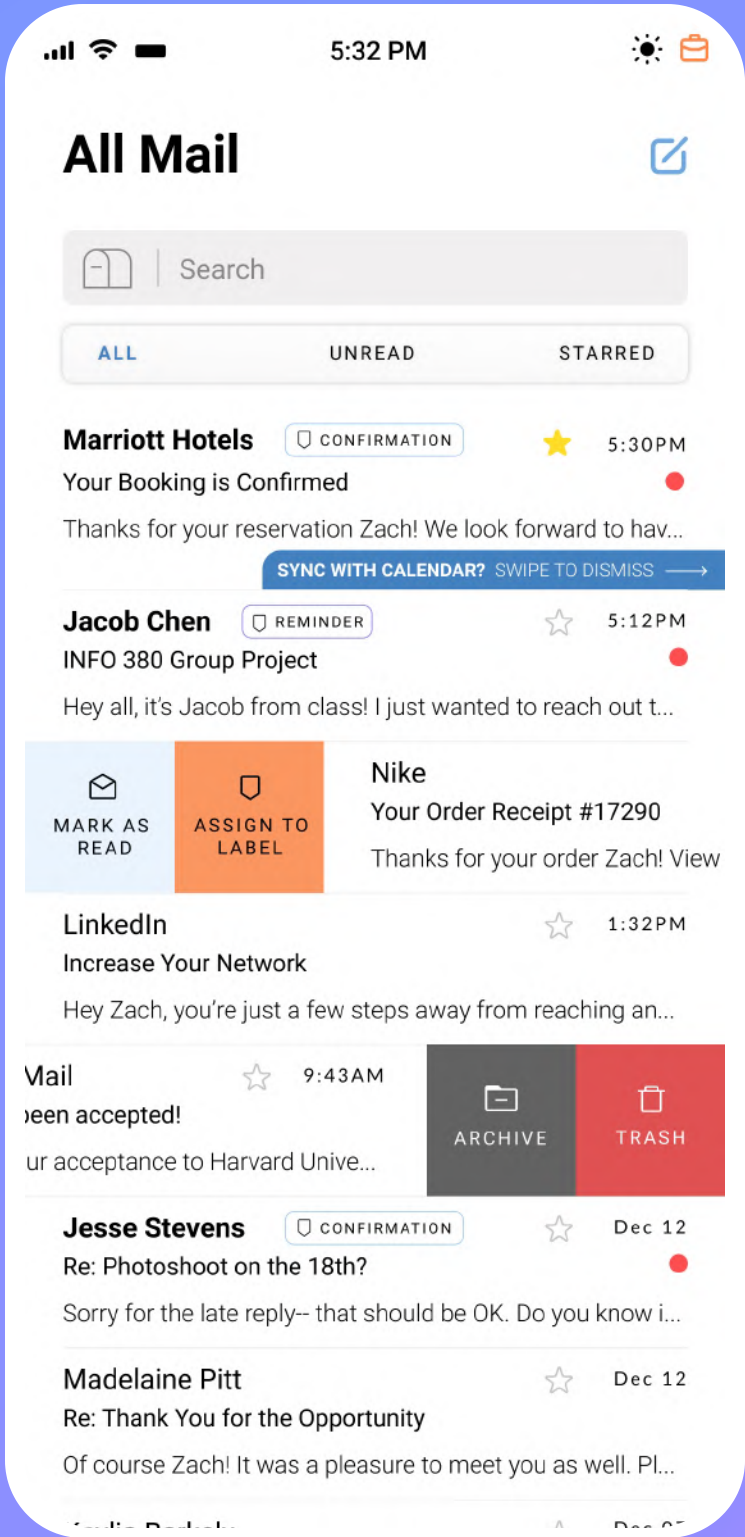

Slide for quick actions.

Conversation

Message details with customizable background and multi-media functions.

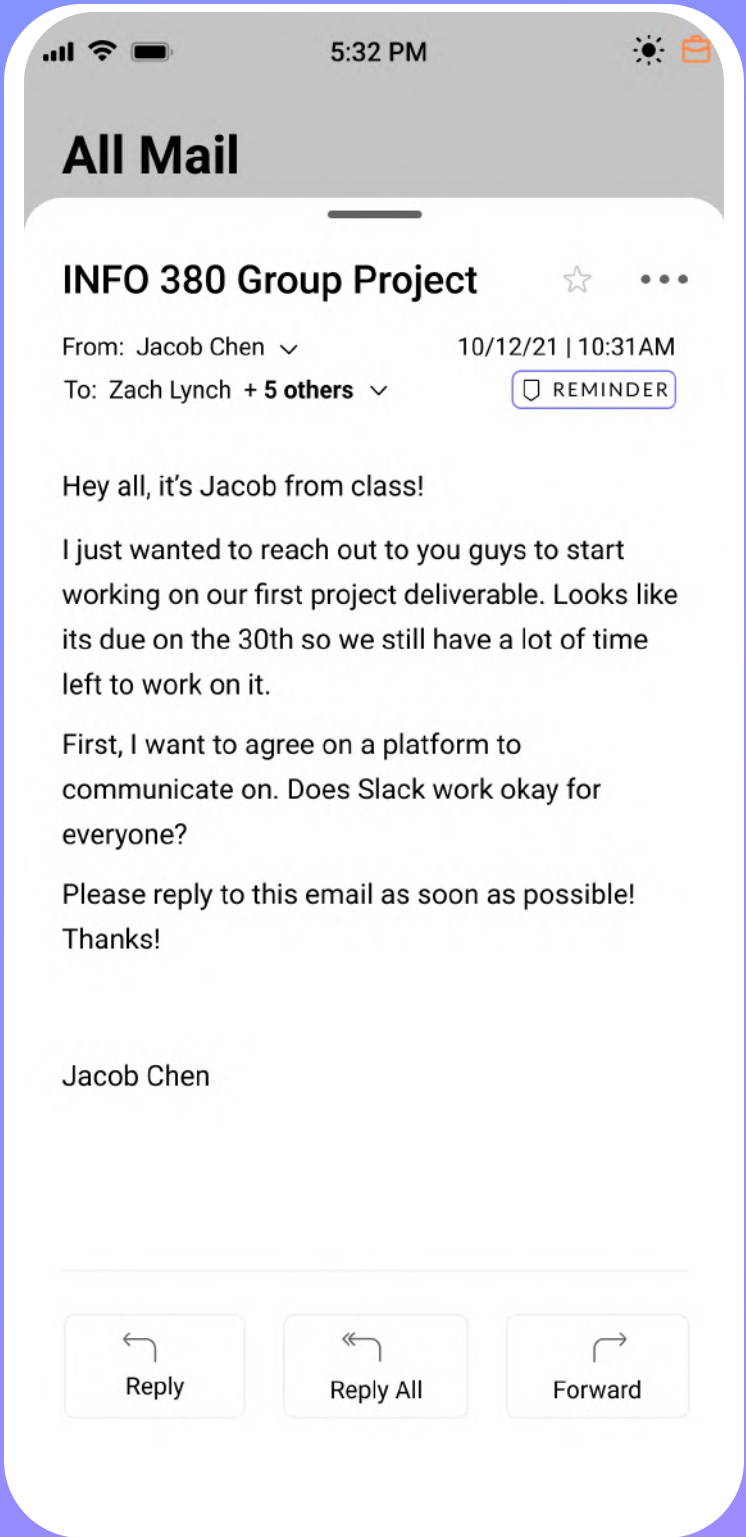

MAIL

All Mail

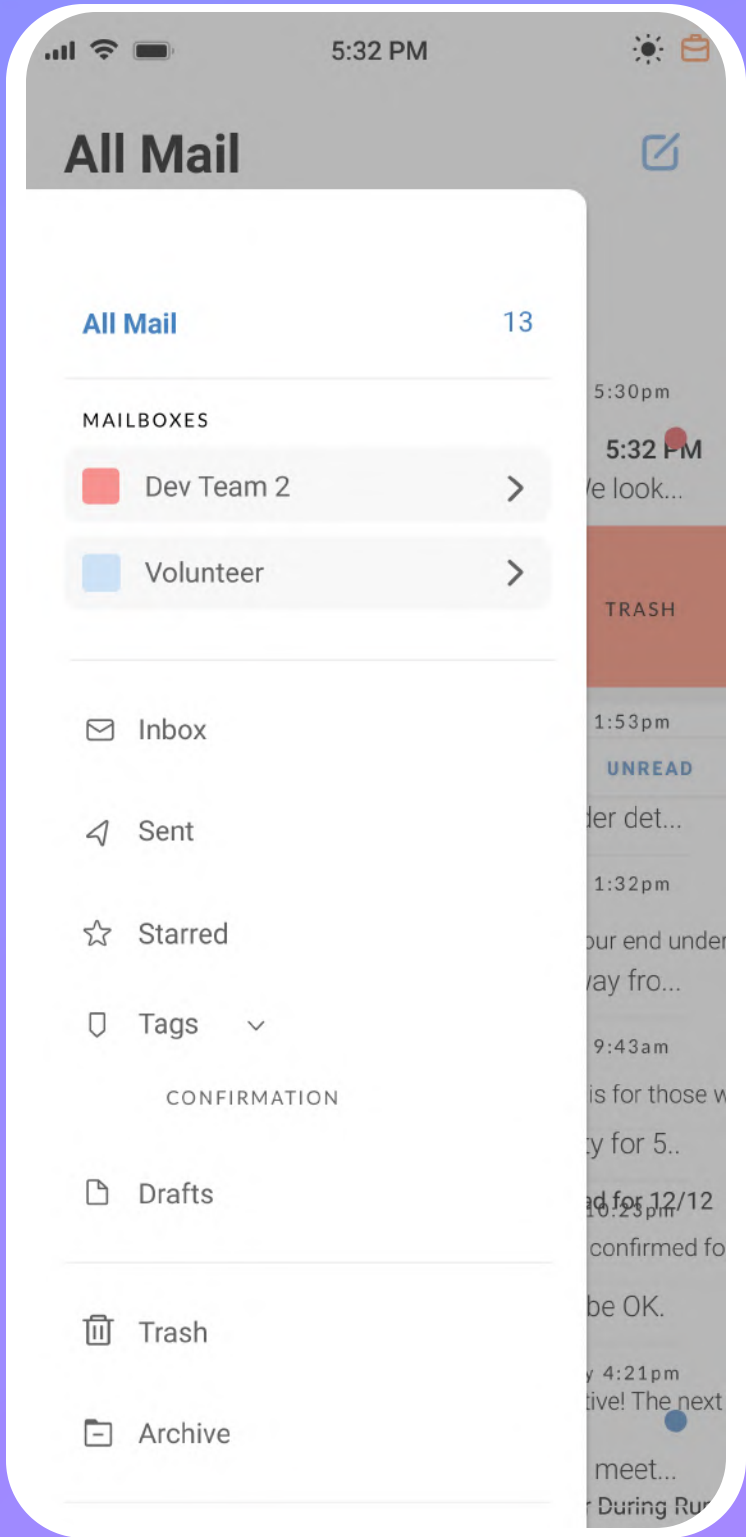

The general mail view displays 3 main tabs that allow for intuitive and easy navigation.

Pitch

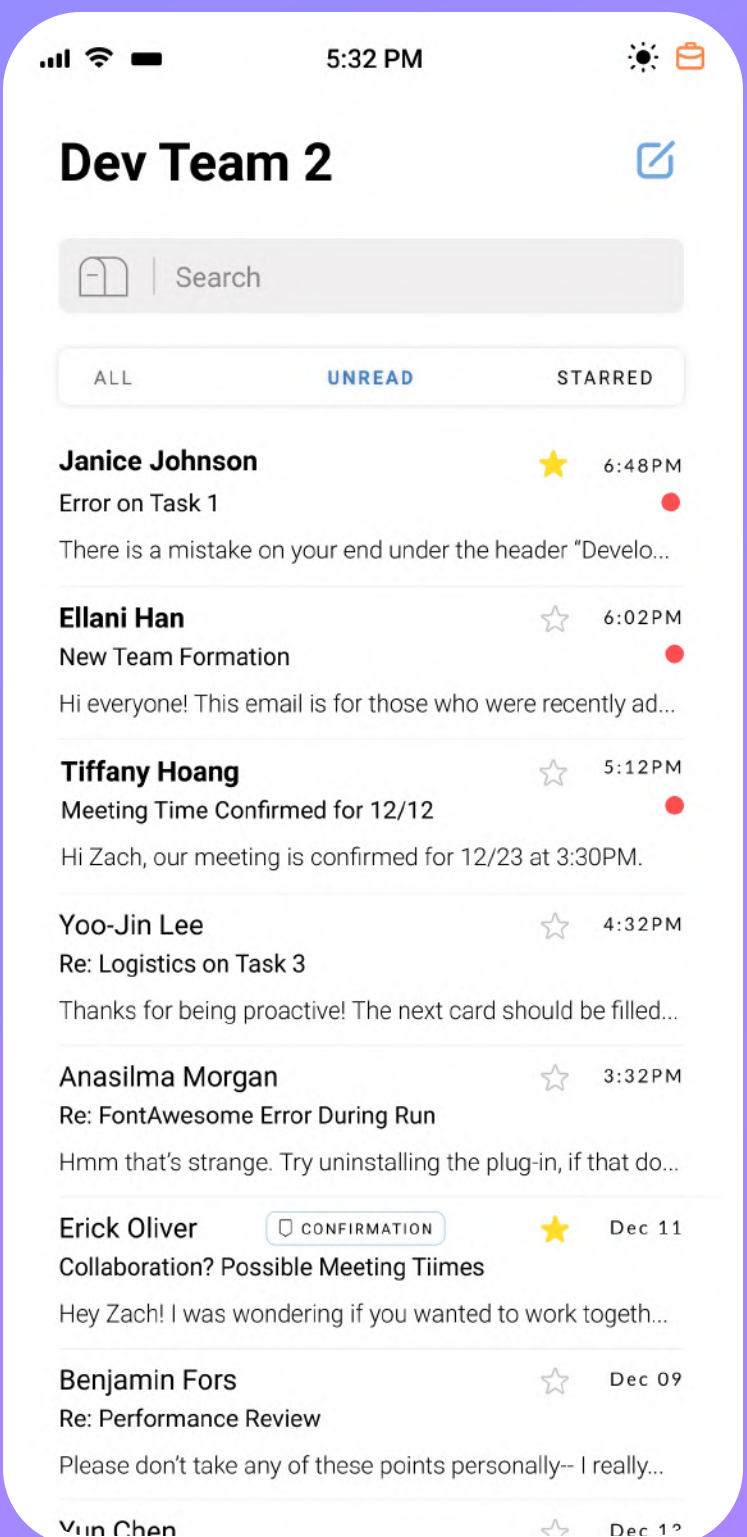

Email View

Each email can be assigned a label that affords categorization and organization to improve productivity.

Categories and Inboxes

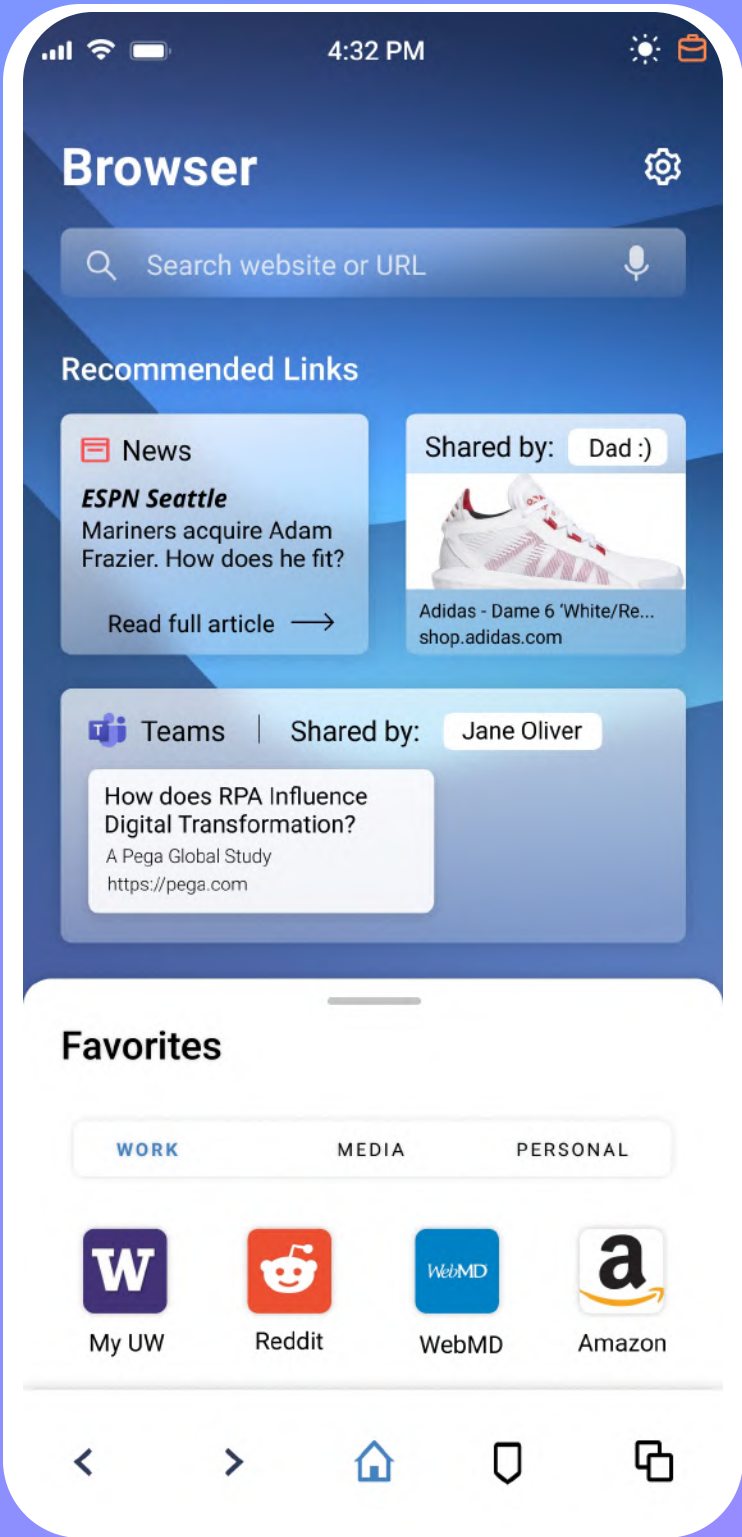

The side tab contains different customizable inboxes or categories that a user's contacts can be assigned to.

Mailboxes

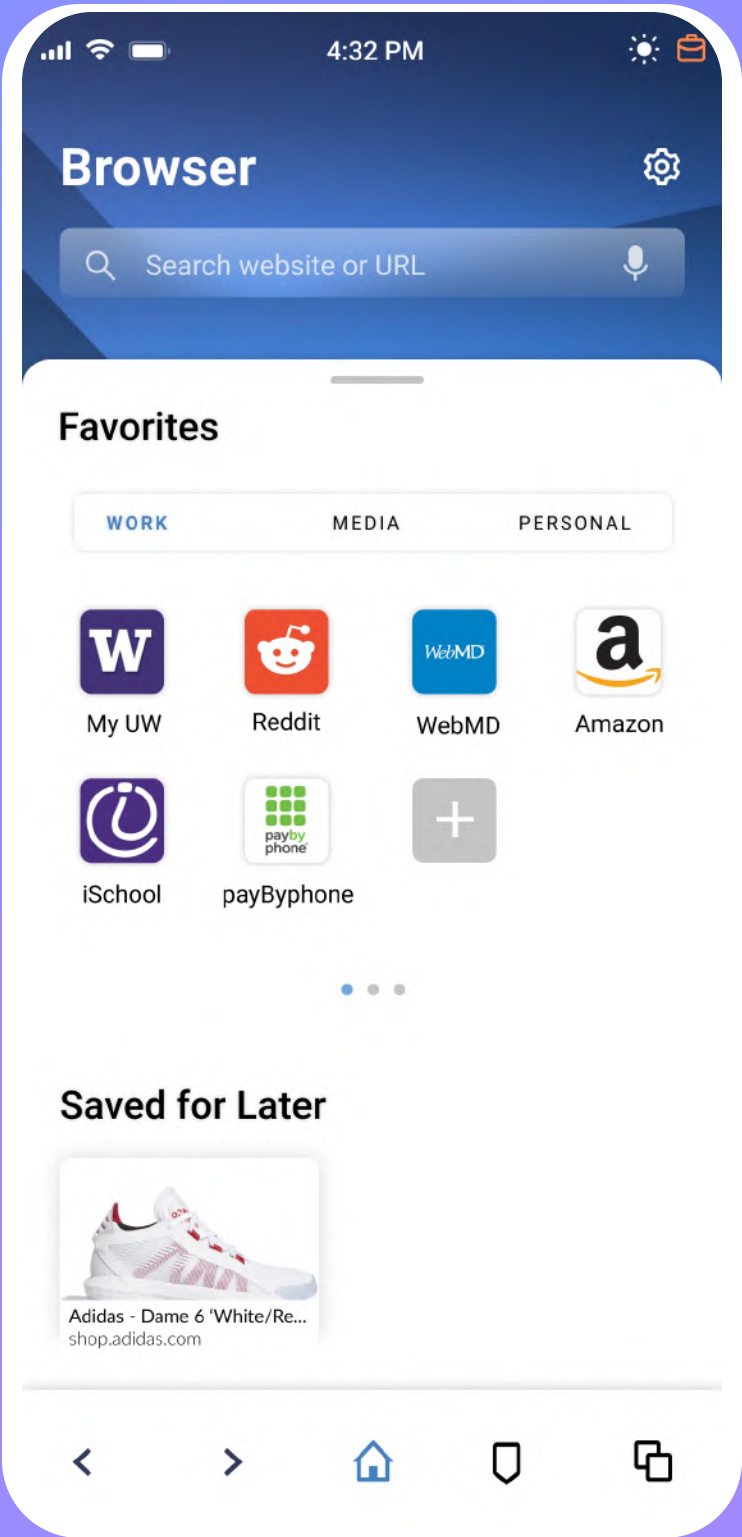

Each mailbox contains all emails from a list of selected contacts. No more scrambling to find important work emails.

BROWSER

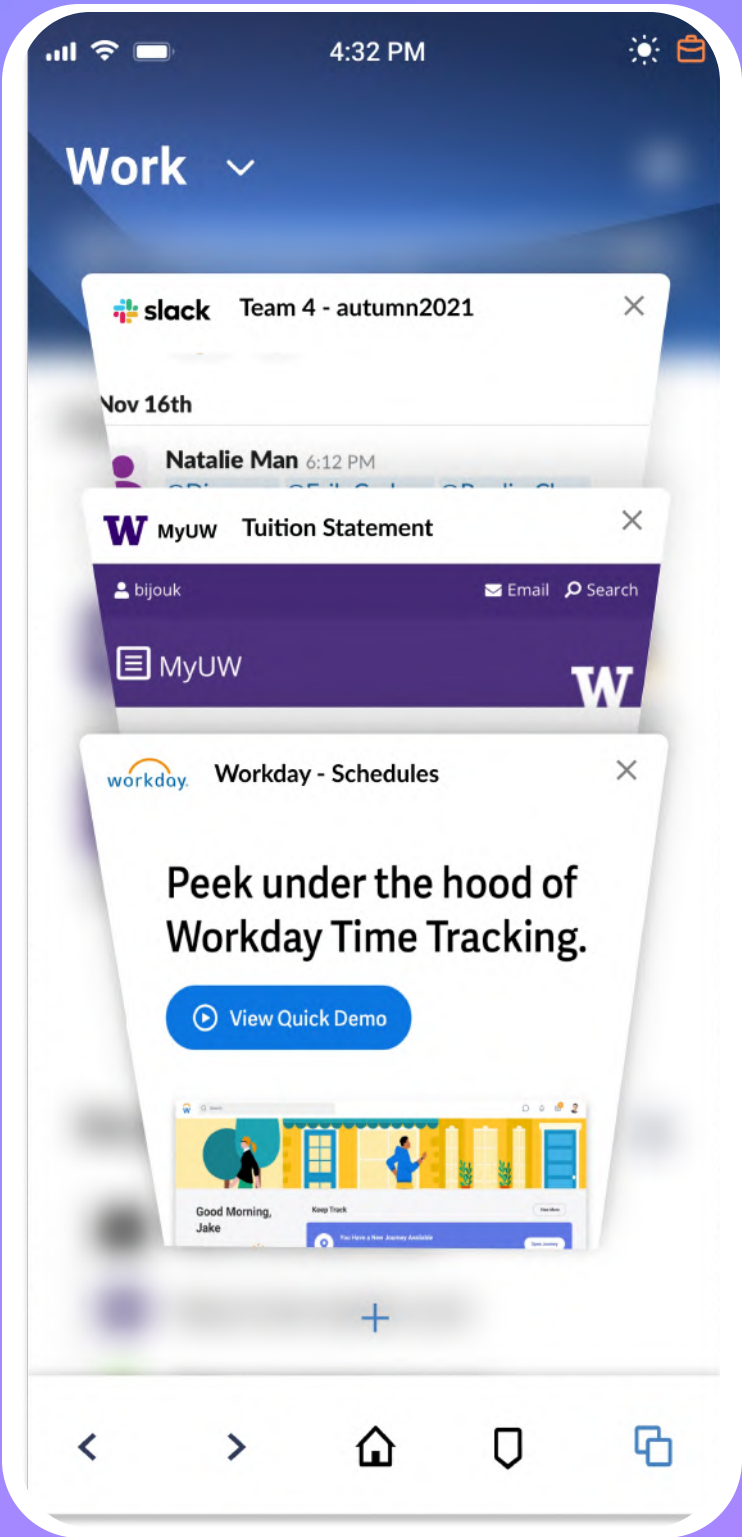

Browser Landing

Contains recommended links, synced from other OS applications and third party apps.

Browser Drawer

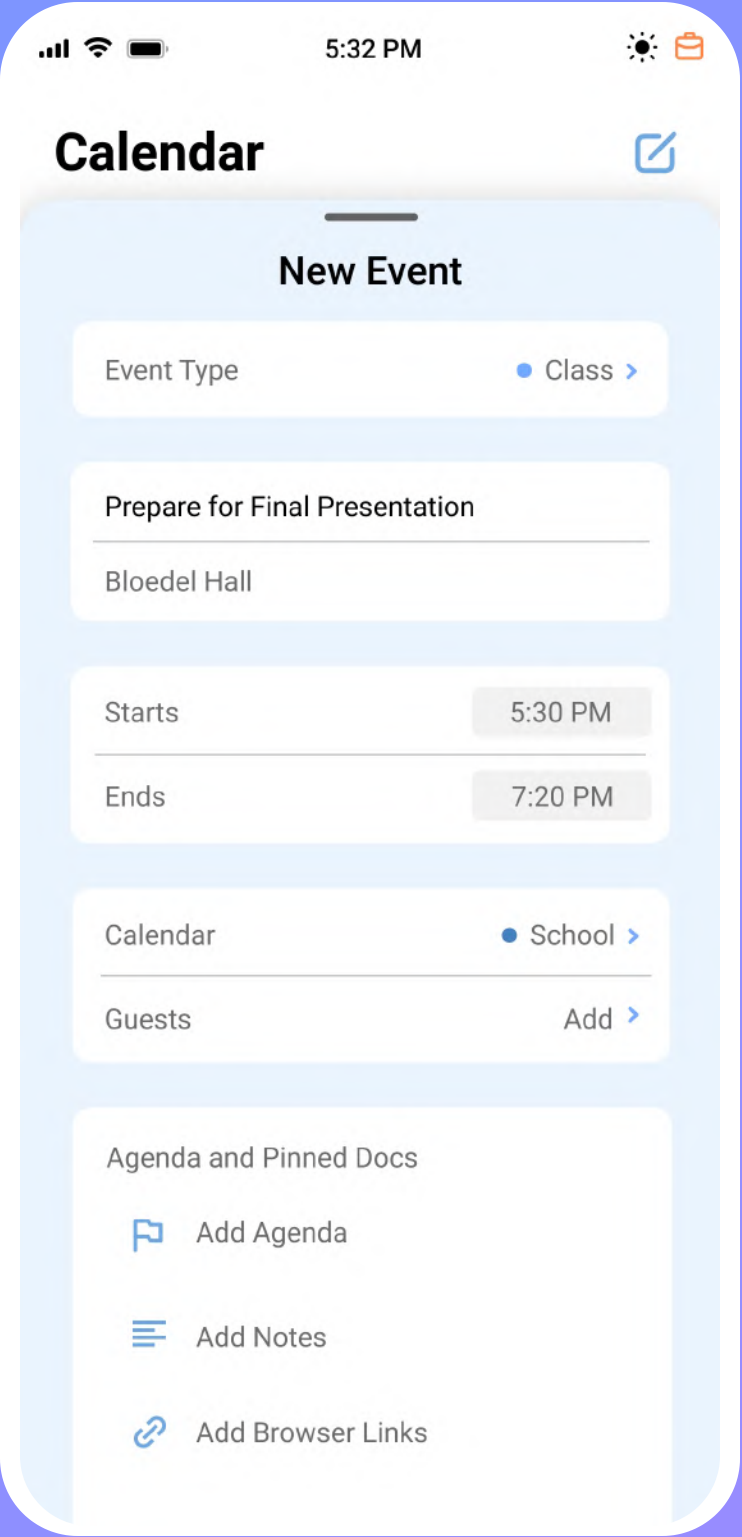

When the drawer is swiped up, favorited websites are displayed organized by categories. These are personalized in settings.

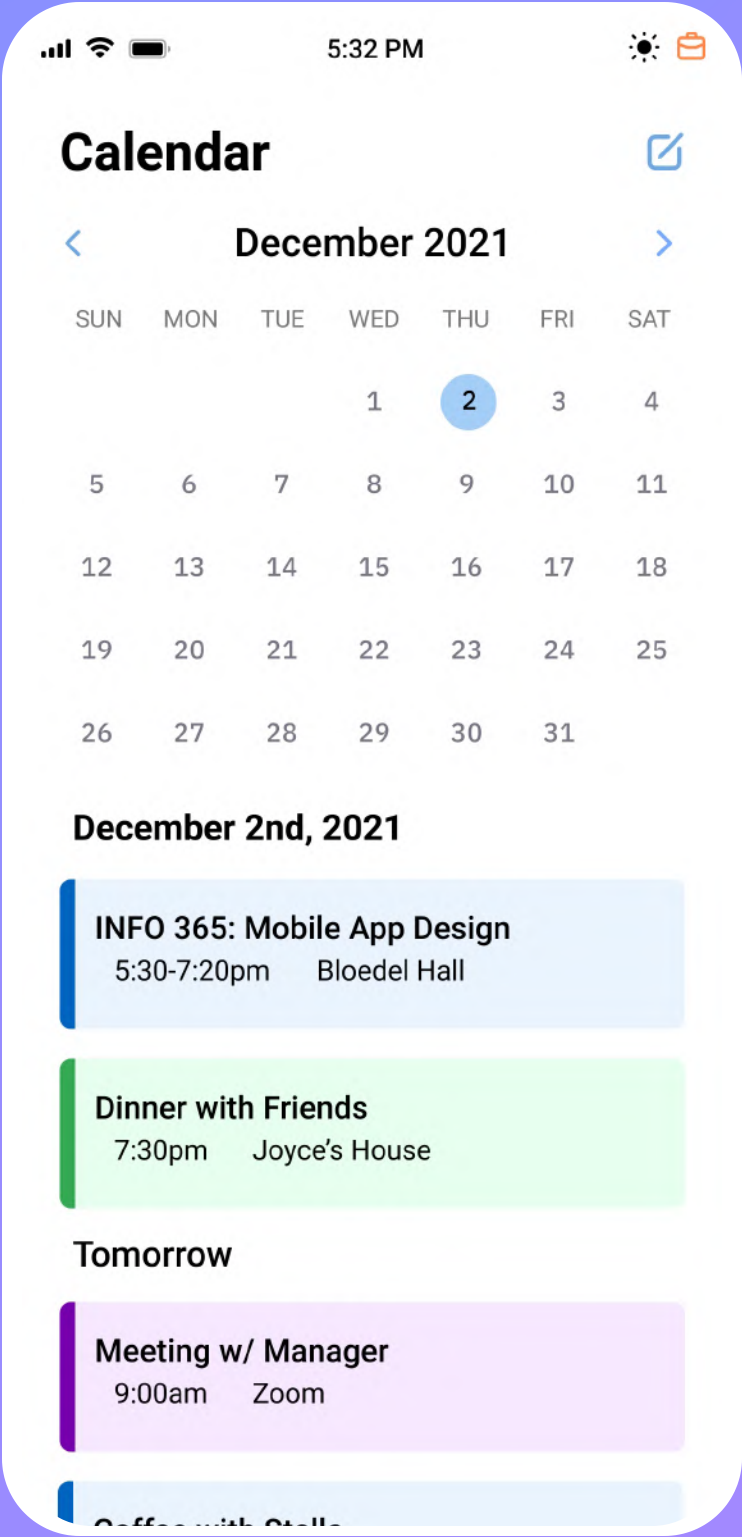

Work Spaces

The browser has the option of creating spaces. The user can organize their work flows and maximize productivity through this feature.

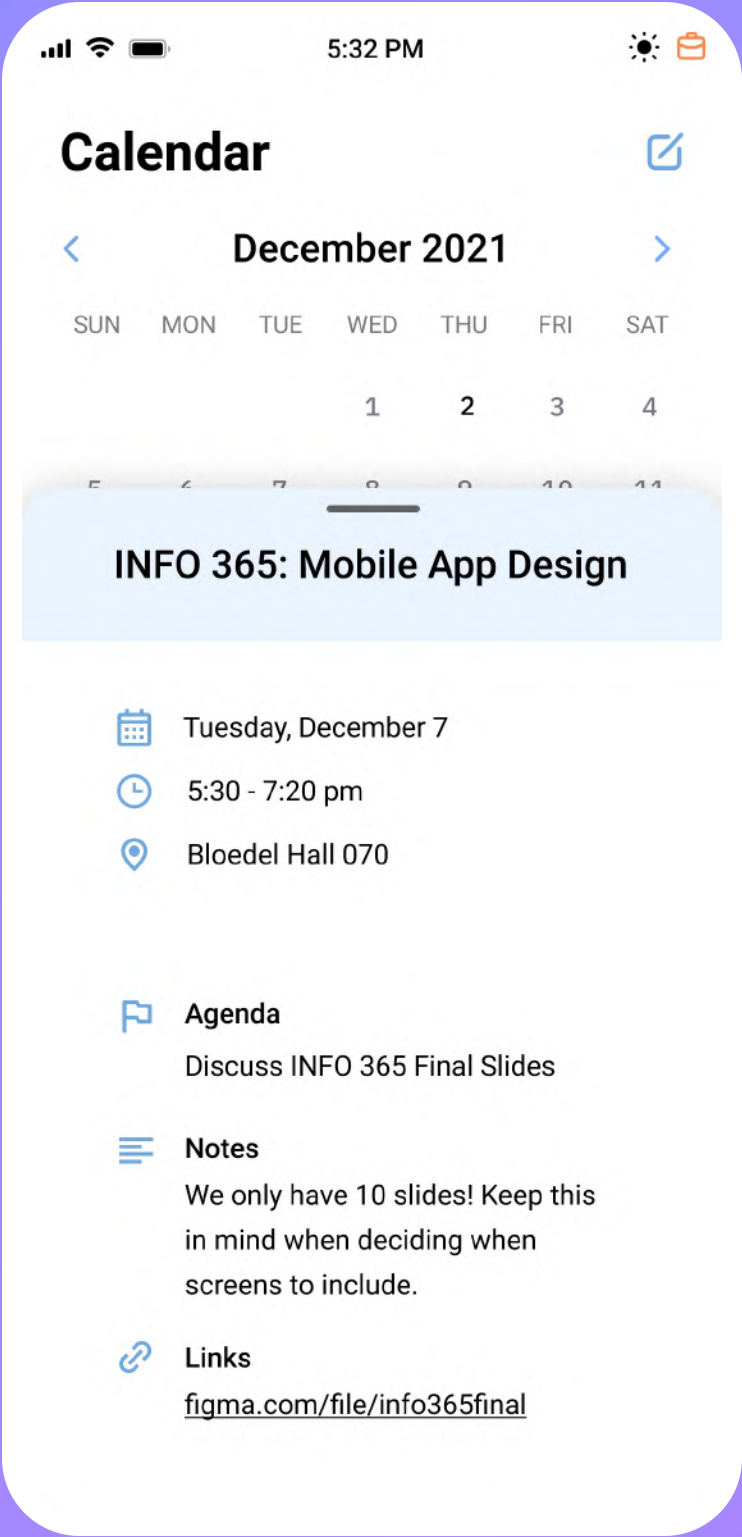

CALENDAR

New Event
Easily create events

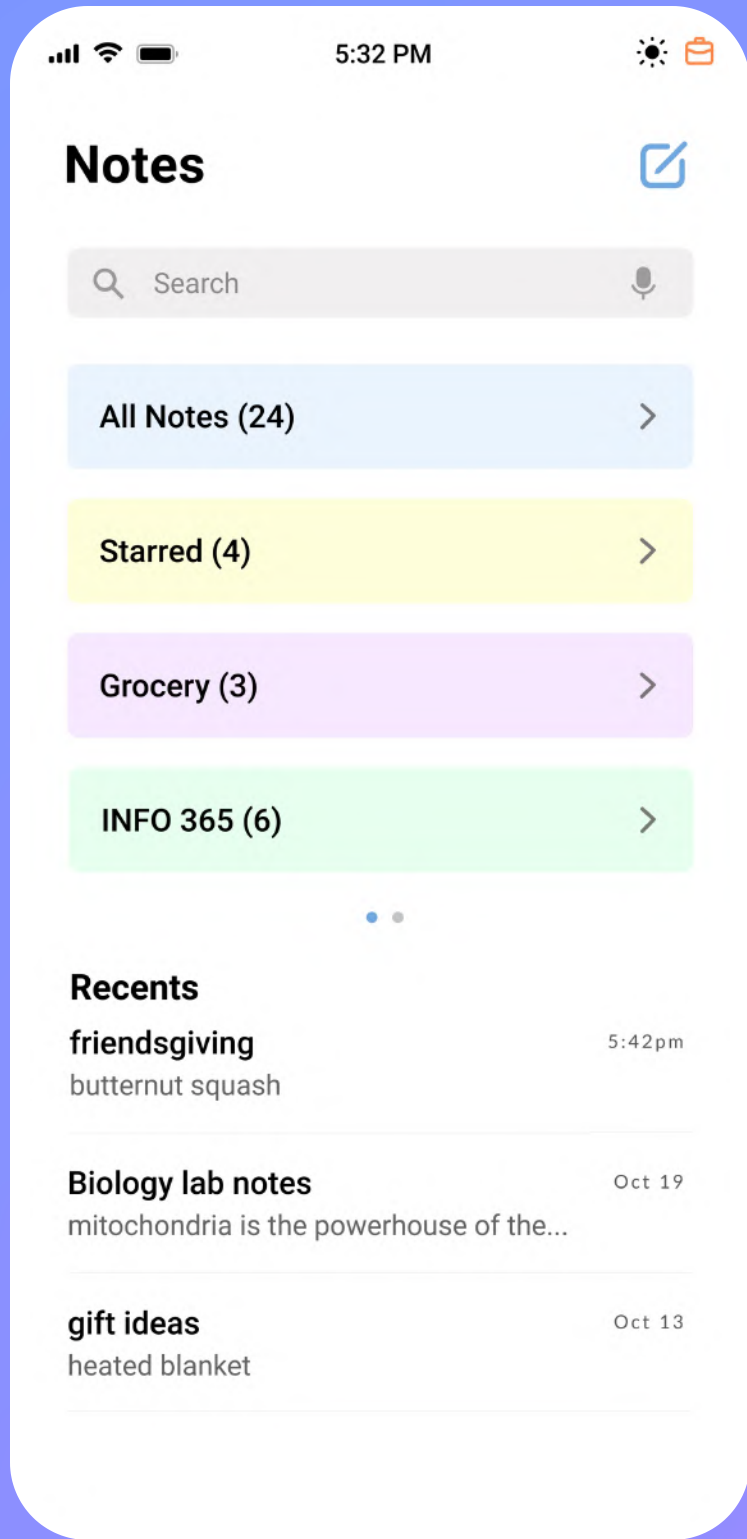

Agenda View
View daily, weekly, and monthly
agendas

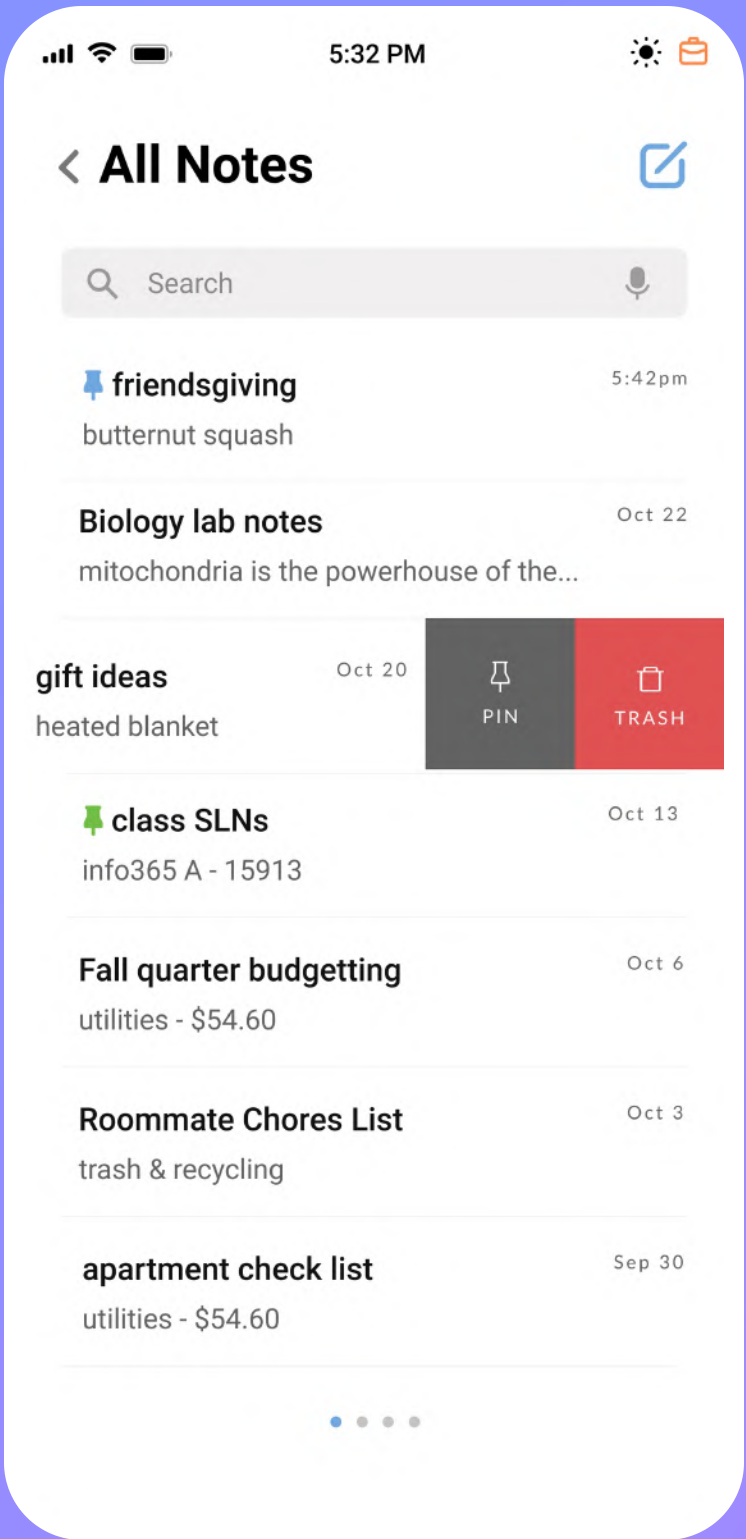

Event View
No more searching for event links and
docs – view everything in one place.

NOTES

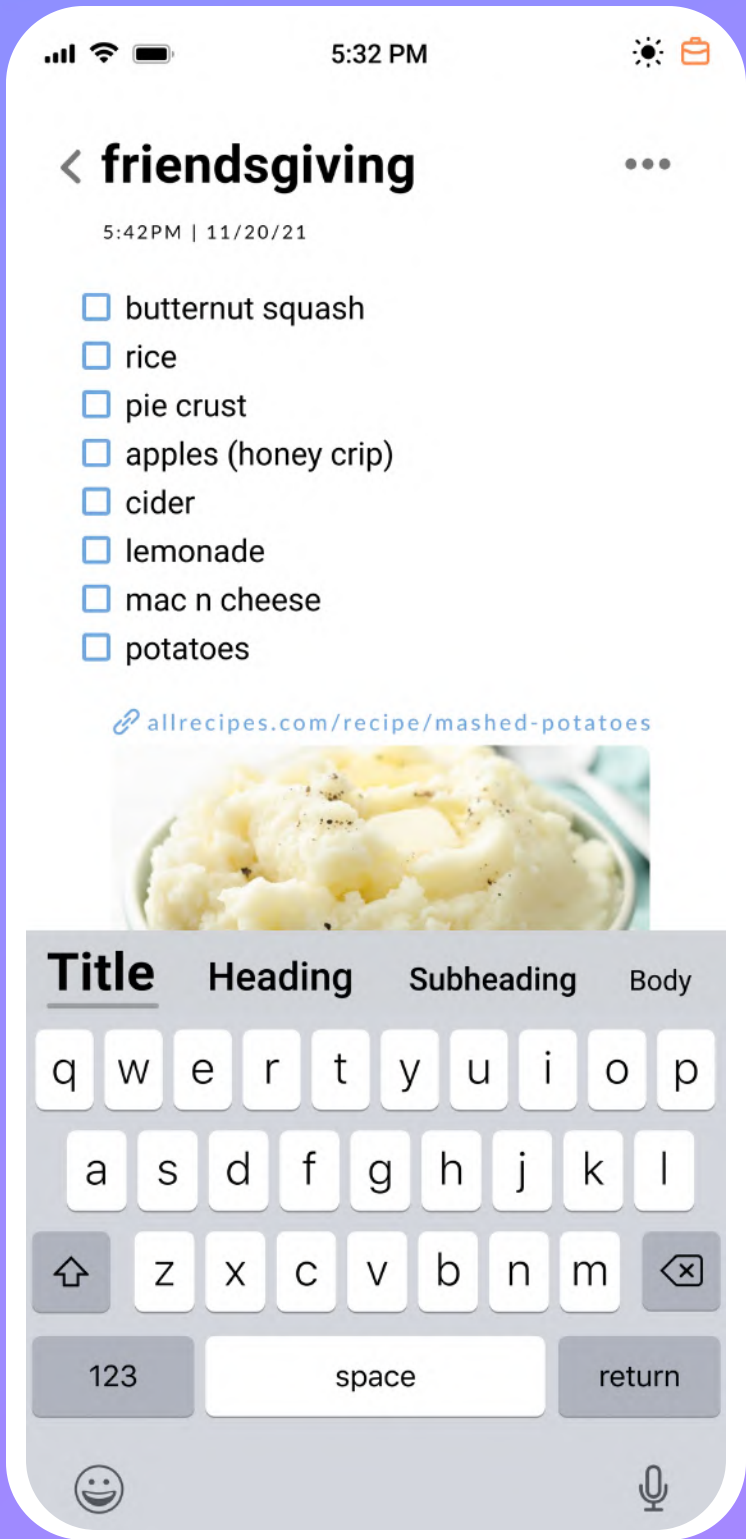

Categories

Notes are easily managed through personalized categories and most recently viewed.

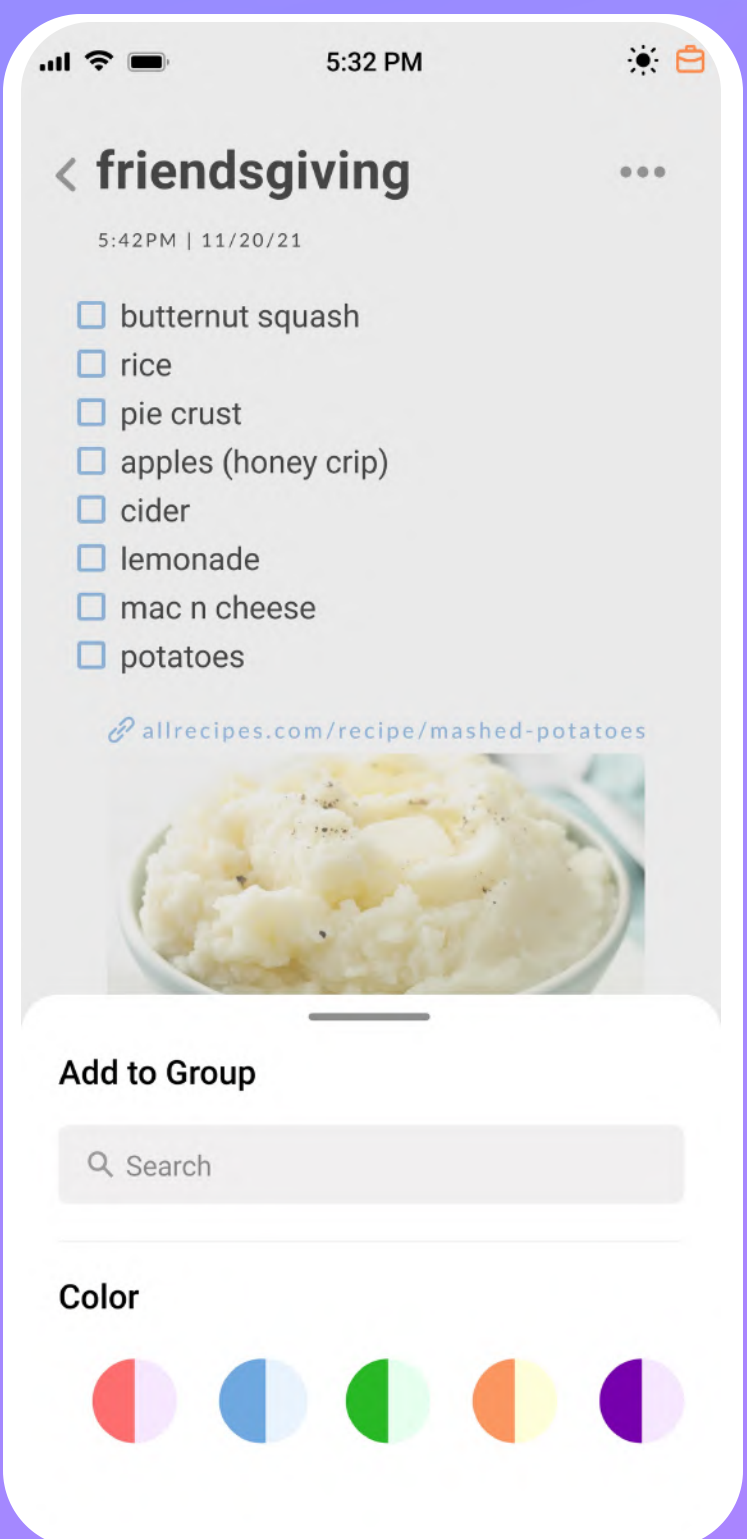

Navigation

Search through notes to pin to lockscreen or delete old ones.

Notetaking

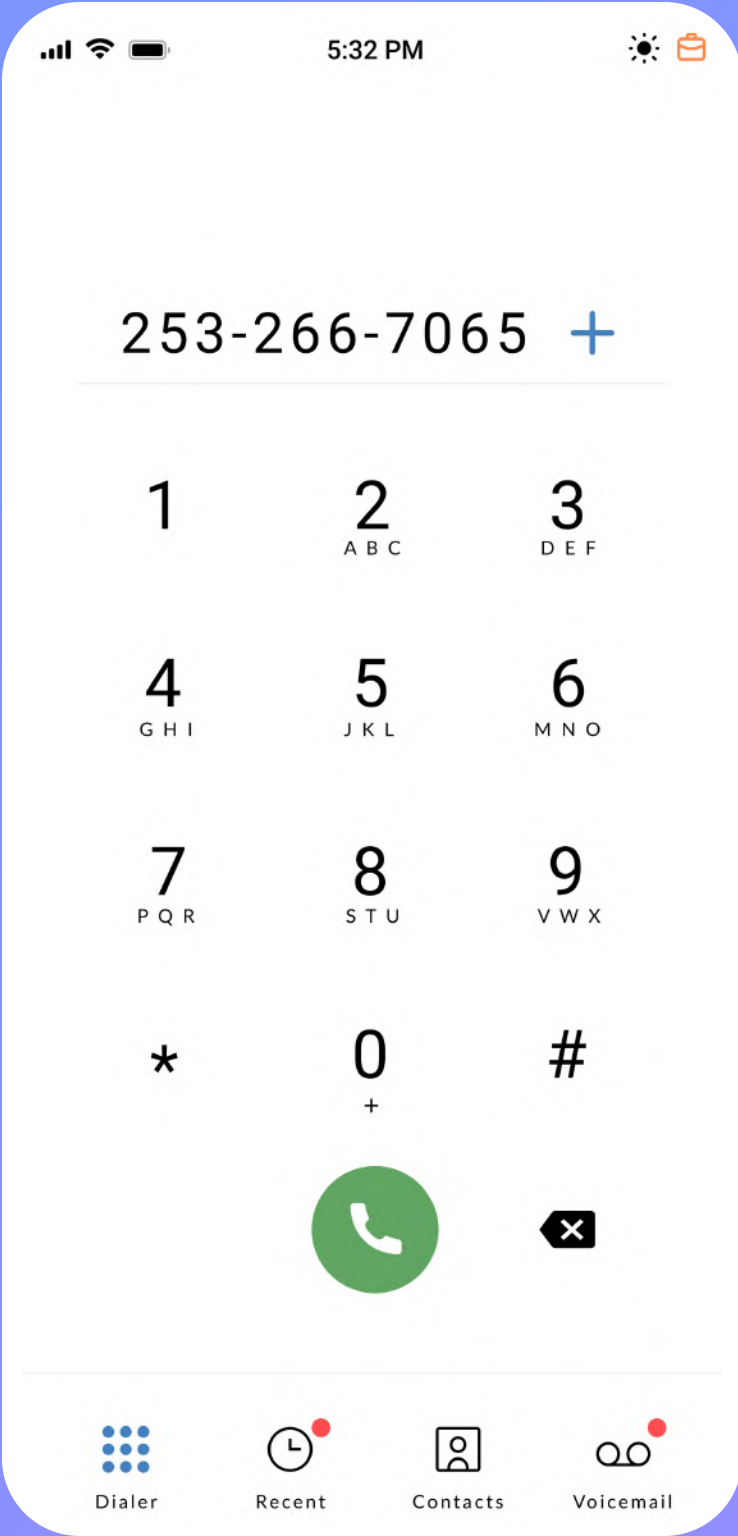

Double tap into your note to edit its content.

Categorization

Add notes to existing or new categories and personalize it with selected colors.

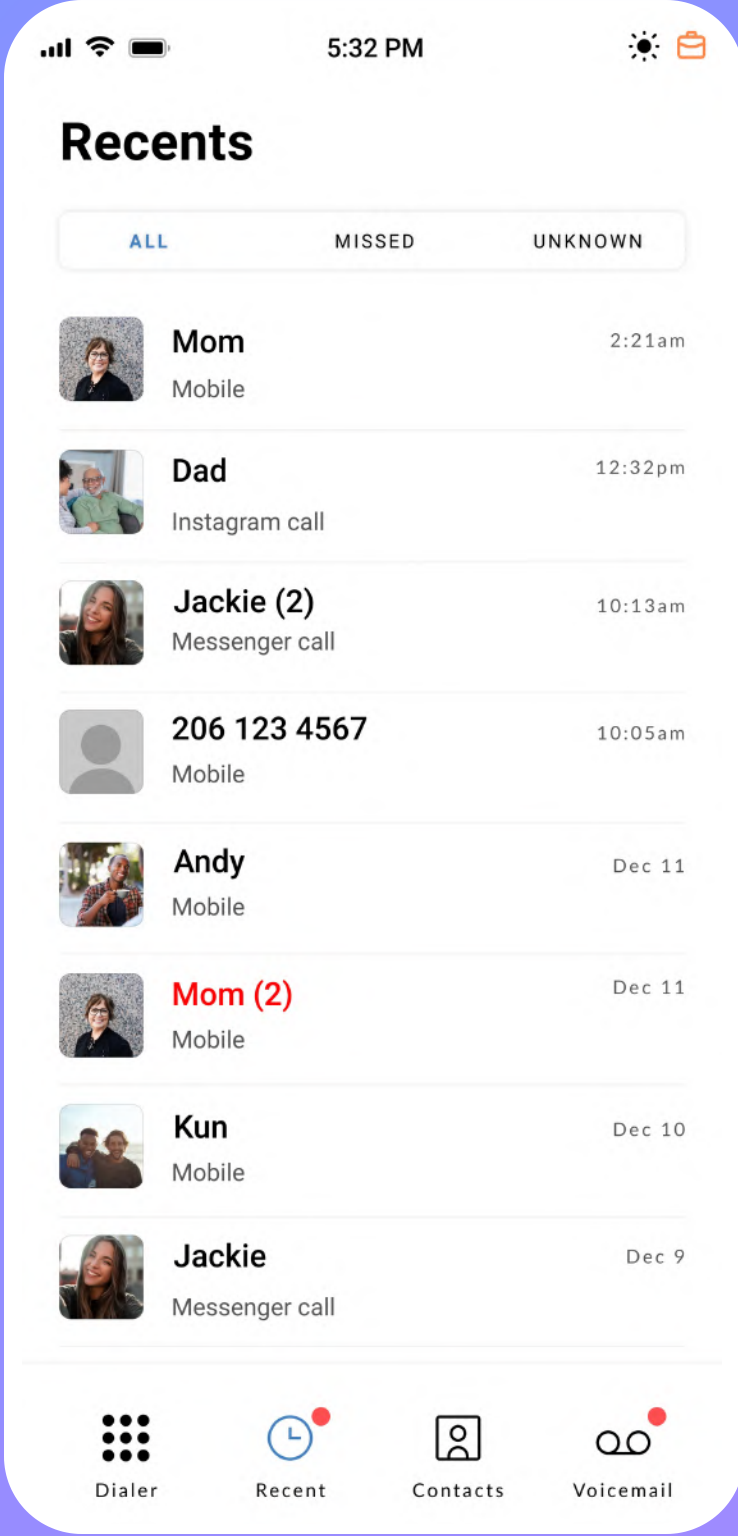

CONTACTS & DIALER

Dialer

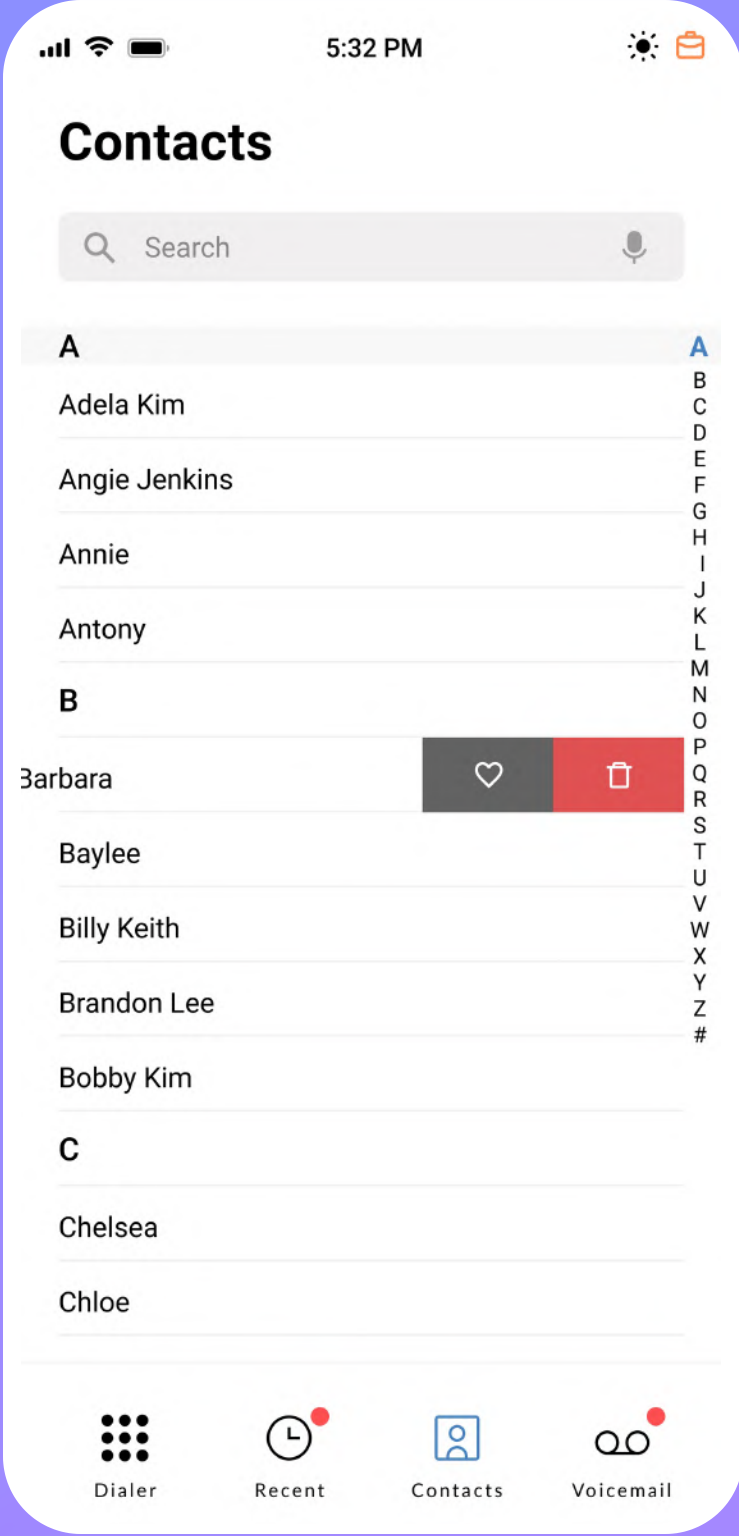

Similar to the lock screen, we have a simple dialer button and layout to make it look neat yet useful.

Pitch

Recents

We can sort and filter the recents by all, missed, and unknown. It also has profile picture to better distinguish the contacts with same names.

Contacts

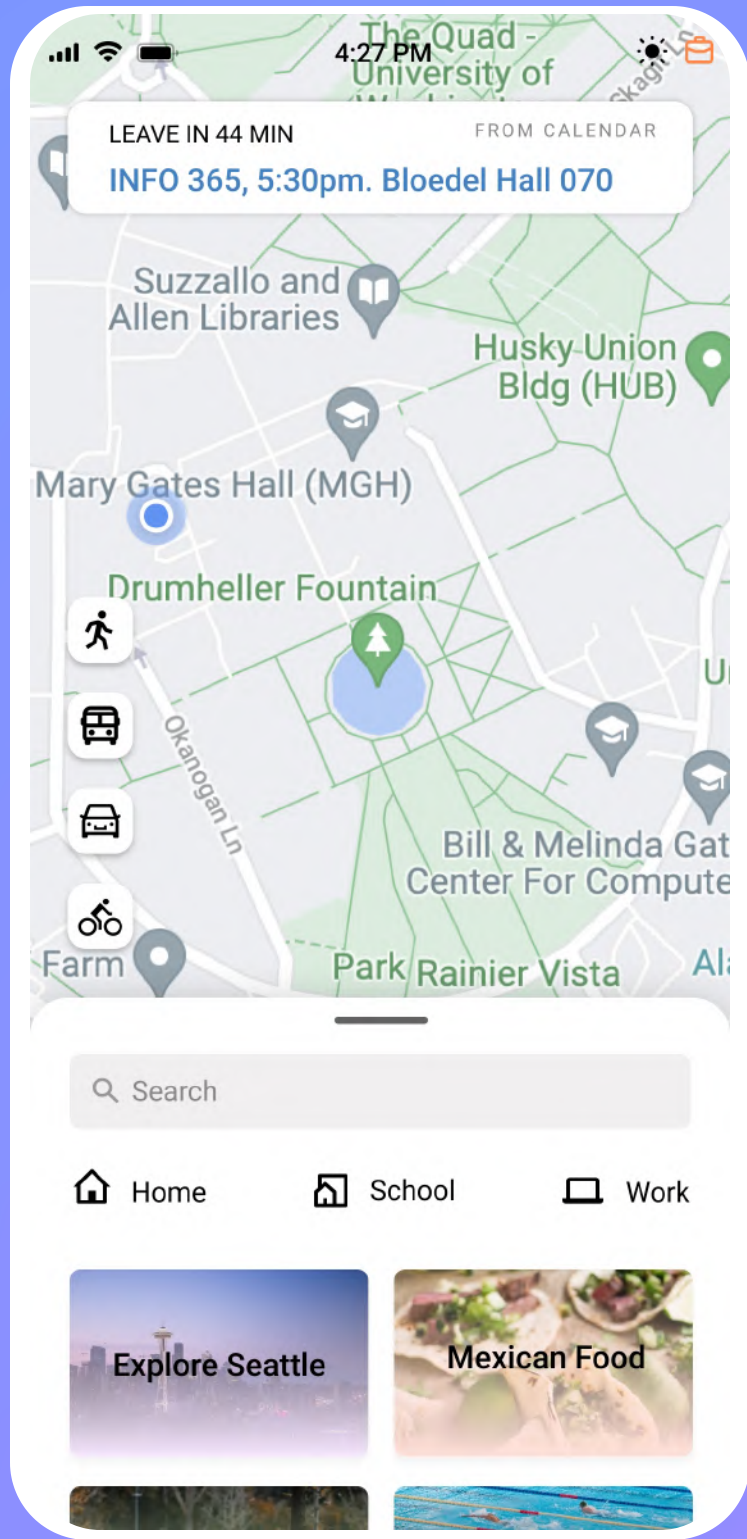

Contacts is simply listed in alphabetical order. User can slide from right to left to either delete or favorite the selected

Voicemail

Voicemail will have profiles for each contact and will be able to play if click the selected contact.

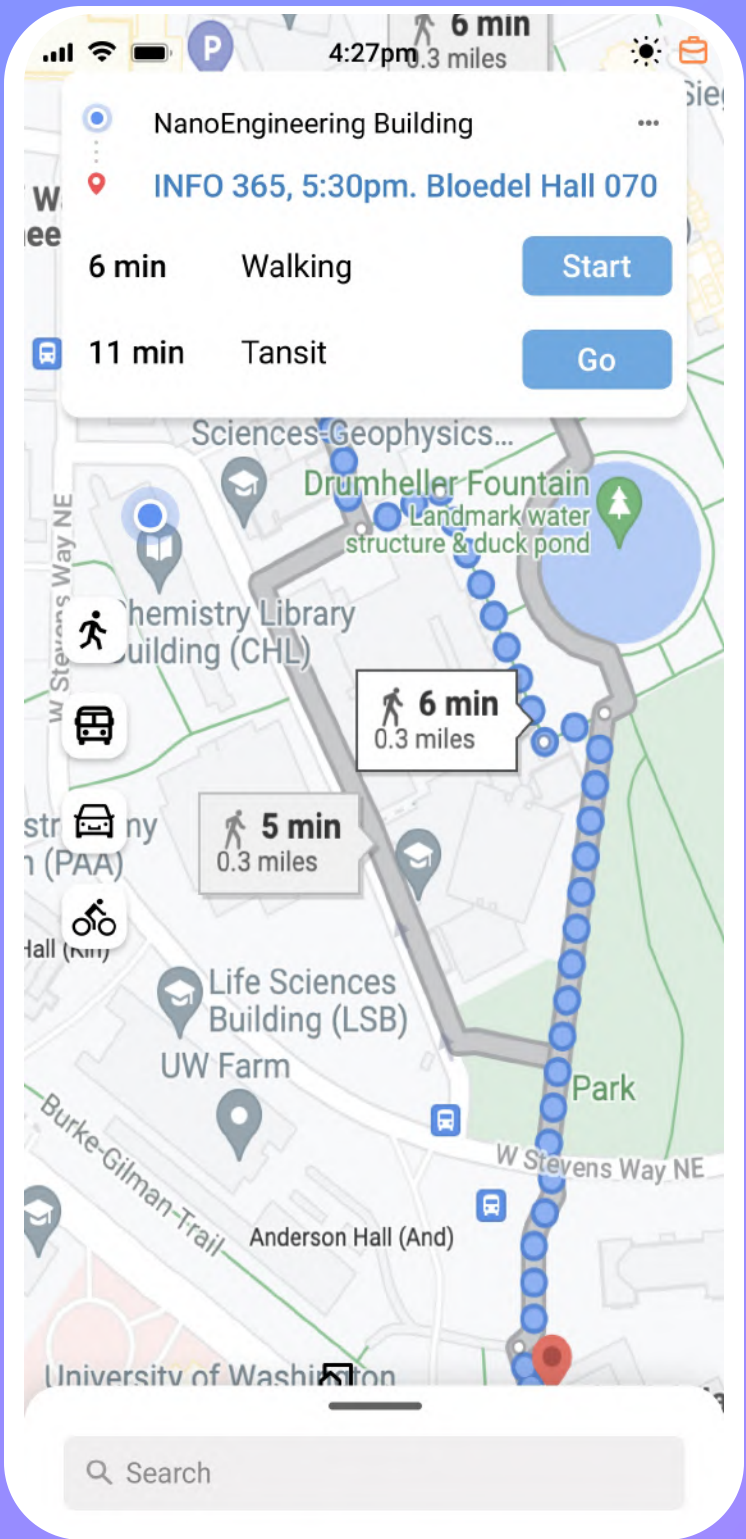

MAPS & WEATHER

Explore

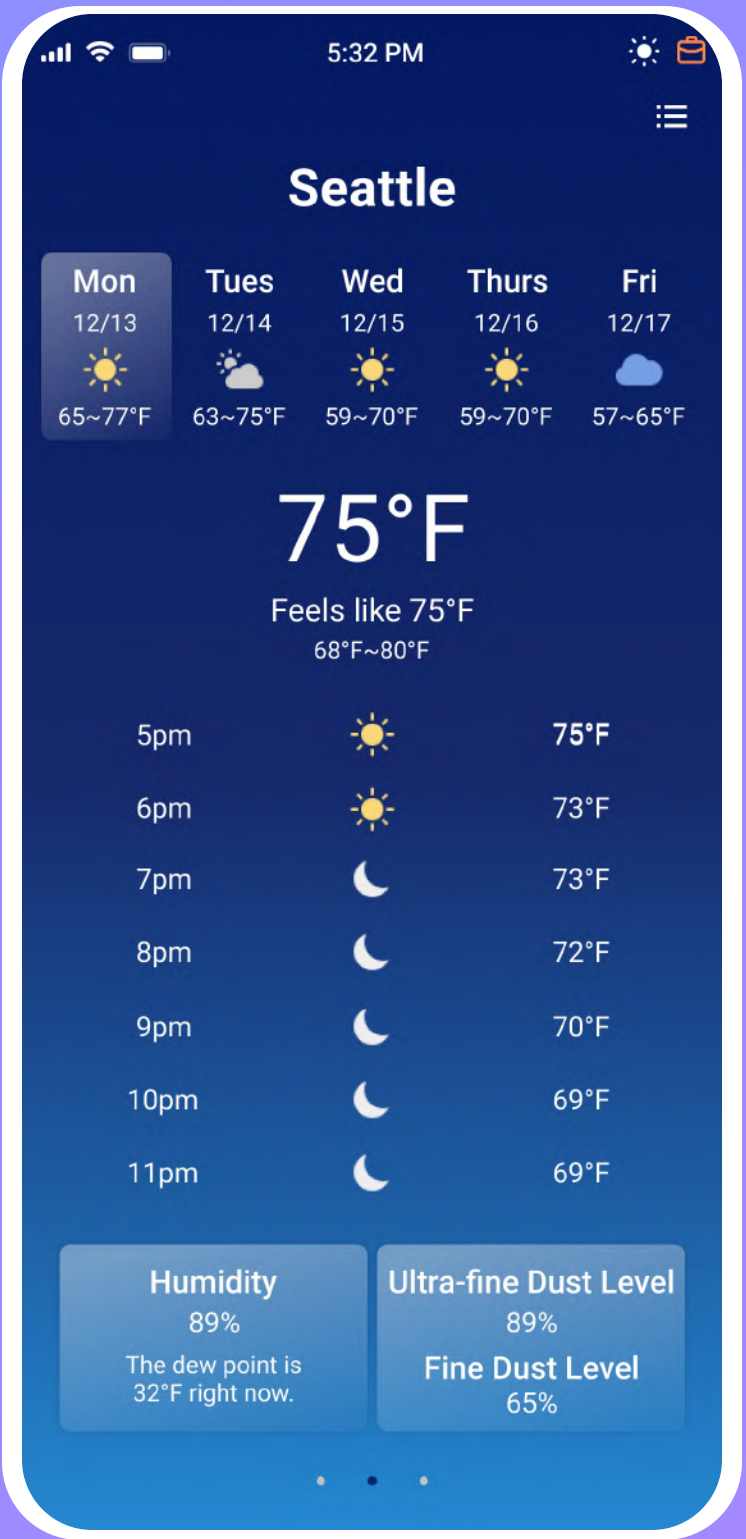

View local guides and easily switch between transportation modes.

Pitch

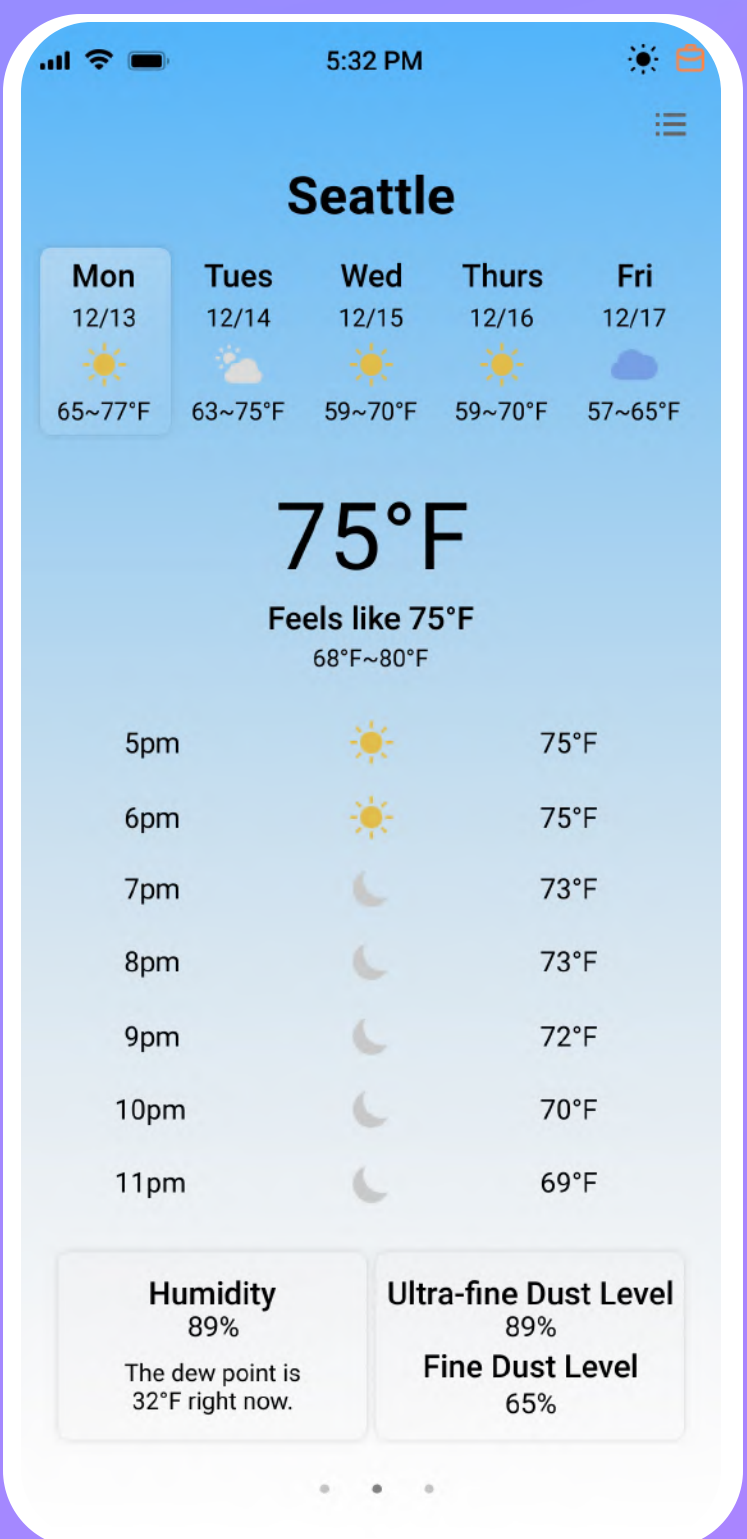

Navigation

Tap Maps Reminders to easily start frequent navigation routes.

Night Mode

Smooth information flow, starting from weekly, current, and today's timeline with other relevant weather information.

Day Mode

Conveniently slide either way to view other location's weather, press top right button to add location!

Team4

THANK YOU
